I N T R O D U C T I O N

TO THE ART OF SINGING.

C H A P I.

Of MUSIC in GENERAL.

MUSIC consists in a succession of pleasing sounds, with reference to a peculiar and internal sense implanted in us by the great Creator. Considered as a *science*, it teacheth us the just disposition and true relation of these sounds; and as an *art*, it enables us to express them with facility and advantage. The tones of music differ from sounds in general, because they vary from each other by fixed intervals, and are measured by certain proportions of time. There is indeed in good speaking a regularity to be observed, which hath some resemblance to this art, and to the orator we not frequently apply the epithet musical. But the inflections of the voice in speech are more minute and variable, slide as it were by insensible degrees, and cannot easily be limited by rule; whereas the gradations of musical sound are exactly ascertained, and may be referred to an uniform standard.

Music naturally divides itself into MELODY and HARMONY. MELODY is the agreeable effect which ariseth from the succession of single sounds. HARMONY is the pleasing union of several sounds at the same time. *Modulation* consists in rightly disposing and connecting either the melody of a single part, or the harmony of various parts.

The TWO PRIMARY and ESSENTIAL qualities of musical sounds are PRO-

* Philosophy hath fully proved that all sounds are conveyed to the ear by means of vibrations, and that acuteness or gravity depends upon the greater or the less number of vibratious communicated in a given time by any particular object.

PORTIONATE DURATION, and relative ACUTENESS or GRAVITY. The first property which we may remark is their TIME, or proportionate continuance. And here we observe, that without varying the acuteness or gravity of the tone, a difference of movement alone may constitute an imperfect species of music. Such, for example, is that of the *drum*, where the tones are only diversified by the celerity with which they succeed each other. The SECOND principal quality is their RELATIVE ACUTENESS or GRAVITY. Bodies of unequal size, or length, or tension, emit sounds differing in this respect. And they are said to be *acute*, in proportion to the smallness, or shortness of the sounding object, or to its greater degree of tension; and *grave* in proportion to its bulk, or length, or less degree of tension.* Thus in a set of regularly tuned bells, the *smallest* gives the sound which we denominate the most acute, and the *largest* that which is said to be the most grave, and the different intervals between them are respectively different degrees of acuteness or gravity. Instead of the words acute, or grave, musicians commonly use the terms *sharp* or *flat*, and sometimes *high* or *low* not that any of these names can be supposed to have a resemblance to the real properties of sound, but merely for the sake of distinction. and indeed it is remarkable, that the ancient Greeks reversed the signification of these words as

applied to the gradation of sound, calling those notes high which we call low, probably because the longest strings in the lyre occupies the uppermost places. The principle distinctions of musical sound then are TIME and TUNE and to the

happy combination of these two qualities, is chiefly to be ascribed the pleasing and endless variety of the musical art.

C H A P. II.

Of TIME with its VARIOUS CHARACTERS.

ONE of the first and most essential properties of music, is TIME, or proportionate duration. And *proportion* evidently supposes a *standard*, with which the length of various sounds may be compared. The standard-note then may be the *semibreve*, which is the slowest note in common use.† The length of the semibreve has been described whilst one may very leisurely reckon four. But it frequently varies from this measure, and is to be considered with regard to comparative rather than absolute duration. It is equal in continuance to two *minims*, or four *crotchets*, or eight *quavers*, or sixteen *semiquavers*, or thirty-two *semi-semiquavers*. For the characters whereby these notes are expressed, and also for those marks which denote a rest or silence of the same length, see Plate I. Example 1.

A *DOT*.] A DOT added to any note, makes it half as long again as it otherwise would be. Thus a dotted semibreve is equal to three minims, a dotted minim to three crotchets, &c. Plate I. Ex. 2.

FIGURE OF 3.] The figure THREE, placed over three notes of equal length, requires that they be sung or performed in the time allotted to two of the same kind. Plate I. Ex. 3.

† Formerly two other characters were in use to express notes of greater length than the semibreve. The first was called a *large* being a long and square note. The second was in figure similar to the other, but only half its size and half its duration, in respect to which it was called a *breve*.

STAVE.] A STAFF, or STAVE, consists of five parallel lines on which, and the intermediate space, the musical characters are generally described. Plate I. Ex. 1.

A BAR.] A BAR is a perpendicular line drawn across a stave, and dividing a piece of music into small, convenient, and equal portions. Thus when a company of soldiers march to military music, every time they strike the ground with the *right* foot may be represented by a bar. Or if it be convenient to divide a tune into smaller portions, every time they strike the ground with *either* foot may be considered as a bar. And these bars include an equal duration of time, whether consisting of notes or rests. They generally, but not always, mark those parts of the tune which are distinguished by a greater emphasis. A bar is also used to denote so much of the music as is contained between two bars. A double bar shews the ending of a line or strain. Plate I. Ex. 4.

COMMON and TRIPLE TIME.

WHEN the bar naturally subdivides itself into *two* parts, or *four* or *eight*, &c. i. e. when the measure thereof is continually *bisected*, a tune is said to be in COMMON TIME. When the natural division of a bar is into *three*, or *six*, or *twelve*,

The first was called a *large* being a long and square note. The second was in figure similar to the other, but only half its size and half its duration, in respect to which it was called a *breve*. The *semibreve* as the name denotes, was half the *breve*, and the *minim* was the least note in use.

i, e. into three, or *three continually bisected*, it is said to be in TRIPPLE TIME.

Moobs.] Both common and triple time admit of various degrees of swiftness which are marked at the beginning of a tune by characters called MOODS.—Plate I. Ex. 5.

The principal modes of common time are three. The first is the plain letter C. and is used to express the *slowest* movement. The second is the letter C with a stroke through it, and intimates a *quicker* motion. The third is the letter C inverted, and denotes the *swiftest* common time that is generally met with in church music.

The marks of triple time are, for the *slowest* movement $\frac{3}{2}$, and for *quicker* movements $\frac{3}{4}$. There are also other figures made use of, and other combinations of time, but they less frequently occur in sacred music. And it may be sufficient to observe, that all the moods which are expressed by figures, whether in common or in tripple time, refer to the *semibreve*. Thus $\frac{3}{2}$ indicates that the bar contains three minims, or *three halves* of a semibreve; $\frac{6}{8}$ is six quavers, or *six eighths* of a semibreve, &c. We have thus explained the usual marks of time, but we must not omit to mention, that the same mood does not uniformly represent the same degree of quickness in different tunes. Instead of being an absolute standard and universally applied, it is rather used to shew the *relative* quickness or slowness of an air compared with a preceding or following one. And for the degree of swiftness adapted to any particular tune, experience and a good ear will be our best and surest guide.

BEATING OF TIME.] BEATING OF TIME is only an artificial method of making the movement of a musical air, and is performed in various ways, but generally by the hand or the foot. In many tunes a gentle stroke of the hand corresponding with the beginning of each bar might be deemed sufficient for the purpose. In common time it is more frequently recommended to the learner to give one half of the bar to the hand *down*, and the other half to the hand *lifted up*. In *triple time* he may divide the bar into *three* equal parts giving the *two first* to the hand *down*, and the last to the hand *lifted up*. But the beating of time it is obvious may be practised in various ways, and it is sufficient to have hinted at the most common methods.

A HOLD.] An arch with a dot placed over any note is called a HOLD, and directs that note to be continued beyond its customary length. Sometimes it is intended to signify a sudden and short *pause*, at the option of the leader of a band, who may take this opportunity of introducing a flourish or short voluntary. Sometimes when the former part of the tune is repeated, it points out the *final close*. In psalmody it is often used for the purpose of a *double bar*, to shew the conclusion of one or more lines. Plate I. Ex. 4.

Note, the first and last bars of a tune are not always complete; and in psalmody, the first and last bars even of a single line are often deficient. But it is a general rule that the first and last bar, taken together make a full bar, so that in the singing of one or more verses, no interruption is occasioned.

C H A P III.

Of TUNE or the DIFFERENT DEGREE of MUSICAL SOUND.

HITHERTO we have considered musical sounds as distinguished only by their duration, we now proceed to observe their relative ACUTENESS or

GRAVITY. And this also supposes a *standard*, with which they may be compared, to which we give the name of the key note.

KEY-NOTE

KEY-NOTE.] The **KEY-NOTE** is so called because it governs and explains all the rest. It is a predominant tone to which all the other sounds have a reference, and it is generally the concluding note of the principal part, and always that of the bass.

OCTAVE,] Taking then the key-note for a standard, we may ascend or descend through a series of seven degrees of sound, after which we come to another series of seven notes corresponding with the former, and this series may be repeated as often as the compass of music requires. These seven degrees of sound are marked by the first seven letters of the alphabet, ABCDEFG, which letters recur again with every successive series. And from any note to the eighth above or below is said to be an *actavo*, i. e. a compass of eight notes including the two extremes. And we may observe that as those notes which are octaves to each other are called by the same name, so they have the same nature and coalesce as it were into one sound. This may be illustrated by the common performance of psalmody, in which women and boys generally sing every note an octave higher than the men, when they are said to join in the same part.

TONES AND SEMI TONES.] The seven intervals of sound that take place in the octave are found to be unequal. There are five greater called *tones*, and two smaller called *semitones*.

SHARP AND FLAT KEYS.] When reckoning from the key-note. the two semitones lie between the third and fourth ; * and between the seventh and the eighth, a tune is said to be in the **SHARP KEY**. But if the place of the semitones be found between the second and the third : and between the fifth and the sixth, a tune is said to be in the **FLAT KEY**. Or it may be sufficient to observe the third from the key note. If it be a *sharp* or *major* third, i. e. if it contains five semitones (including the two extremes) the tune is in the **SHARP**

KEY. If it be a *flat* or *minor* third, i. e. if it comprehend only four semitones the tune is in the **FLAT KEY**. The word *key* is properly applied, as it discovers to us the leading quality of the air, tunes in the sharp key naturally expressing the cheerful and lively passions, whilst the flat key is adapted to the grave, the mournful and the pathetic.

GAMUT.] We have before had occasion to mention the *stave*, the principal use of which is to mark the several gradations of sound. Upon the lines and spaces which it contains are ranged the several notes in order, which are distinguished by the first seven letters of the alphabet. But in order to know the name and place of each note more perfectly, it may be proper to consider the stave as part of the **GAMUT**, or general scale of music. Three octaves, or twenty-two notes, are supposed to comprehend the ordinary compass of the human voice. And these twenty-two sounds are capable of being expressed by eleven parallel lines with their intermediate spaces, see Plate I. Ex. 6. But as the eye would be unable to read with facility so extensive a scale, and as the compass of a single voice does not extend to three octaves, we therefore divide the gamut into different staves of five lines each. The five lowest lines of the scale are allotted to the gravest or lowest voices, and are called the **BASS STAVE**. The five highest are assigned to the voice of women or boys, and are called the **TREBLE STAVE**,

Between the treble and the bass staves there is a particular line, on which is marked the letter C. To this (in order to make another complete staff) we sometimes add the two lowest lines of the treble staff, and the two highest of the bass. Sometimes we take more lines from the treble and fewer from the bass, or more from the bass, and fewer from the treble. And to this staff we give the name of **TENOR**, or **CONTRA**. or **MEDIUS**.

* In reckoning the intervals from one sound to another, we always include the two extremes.

From the first to the second is called a second, from the first to the third is called a third.

CLIFFS.] CLIFFS are characters used at the beginning of every stave in order to ascertain the place of the musical letters, and to shew whether such staff is to be considered as belonging to the treble, the tenor, or the bass. See Plate I. Ex. 6.

The **TREBLE** is called also the **G cliff**, either because it is sometimes represented by a careles G, or because it is usually placed on the line called G.

The **CONTRA**, or **TENOR**, is marked by two upright, and two transverse strokes, and is occasionally placed in different parts of the stave. But observe that the line which passes between the two transverse strokes is always C,— Hence it is called the **C cliff**.

The **BASS cliff** is an inverted C with two points, and the line between these two points is always F. N. B. As the multiplication of cliffs increases the difficulty of the musical art, we have in the following collection confined ourselves to the use of two, viz. the treble and the bass, which appear sufficient for the purpose of common psalmody.

LEDGER LINES.] Sometimes a few notes exceed the compass of the stave, and require the addition of short lines called **LEDGER LINES**.

KEYS IN THE NATURAL SCALE.] The regular place of the semitones contained in the octave, is from B to C, and from E to F. This may be illustrated by the following series, in which these letters are put nearer together than the rest.

Example, G A B C D E F G A B C D E F G, &c. Now if C be consti-

* They are sometimes, but with less propriety, called natural keys. For in nature we have but two keys, the sharp and the flat. The natural key, therefore, has reference merely to the written scale and is only a particular manner of expressing either the sharp or flat key.

tuted the key-note of a tune in the sharp key, the semitones will fall out in their regular order thus :

C D E F G A B C.

1 2 3 4 5 6 7 8.

Here the semitones occur between the third and fourth, and between the seventh and eighth, agreeable to what was observed page 5, under the article sharp and flat keys.

So also if A be constituted, the key note of a tune in the flat key, the semitones will again take place in their proper order, that is, will be from the second to third, and from the sixth to the seventh, thus :

A B C D E F G A

1 2 3 4 5 6 7 8

The keys therefore of C and A, are said to be in the **NATURAL SCALE*** because the natural order of the semitones is preserved, and the music may be written upon these keys, without the characters called.

SHARPS AND FLATS.] There is a convenient pitch, at which every tune should begin, to suit the nature of the voice or instrument. This may not be C nor A; for the music might hereby be too high or too low, It is true that the pitch of the human voice is optional, but that of instruments is necessarily fixed. Besides, were C or A the key-note, the music might not easily be contained within the regular limits of the stave. Now

if we chuse any other letter for the key note of a tune in the sharp key besides C or for the key note of a tune in the flat key besides A, it is evident that the semitones BC and EF will not take place in regular order. Thus let D be made the key-note of a tune in the sharp key. The order of the letters will then stand thus. D EF G A BC D. Here the semitones, which ought to be from the third to the fourth, and from the seventh to the eighth, are found from the second to the third, and from the sixth to the seventh. To remedy this inconvenience, musicians apply certain marks called sharps and flats. A sharp (see Plate I. Ex. 7) indicates that the note before which it is placed is to be sung or played a semitone higher than its natural sound. A flat (see Pl. I. Ex. 7) requires that the note before which it is placed be sung a semitone lower than its natural sound. And if a sharp or flat be fixed at the beginning of a tune, it affects all those notes which stand on the letter where it is placed. A natural (see Pl. I. Ex. 7) takes off the effect of a sharp or flat from the note to which it is prefixed, and reduce it to its natural state. To raise than the octave from D as above, musicians give a sharp to F, and another to C, and by these means cause the semitones to fall out in their proper order thus :

D E sharp FG AB sharp C D

The office then of sharps and flats is to give us other keys besides C or A And this they effect by changing a tone into a semitone, or a semitone into a tone, as occasion may require. But their use and application will more distinctly appear, if we suppose a

SCALE OF SEMITONES.] The series from any particular note to its octave, contains, as we have observed, five tones, and two semitones. Now if we divide each of the five tones into two semitones, we shall represent the octave upon a new scale, as containing twelve semitones. This may be denoted by introducing an asterism, to represent the artificial semitone, thus :

G * A * BC * D * EF * g * a &c.

And by a slight inspection of this scale, the whole mystery of sharps and flats will be easily unravelled. For every asterism may be considered either as the sharp of that letter which it follows, or the flat of that letter by which it is followed. Thus the asterism between G and A is either G sharp, or A flat. And as by the introduction of a sharp or flat, we can make the interval between two succeeding letters either a tone or a semitone, we are no longer confined to the keys in the natural scale, but may assume

KEYS IN THE SCALE OF SEMITONE.] Every letter, nay every semitone in the octave, may be taken for a key. So that we have twelve different keys, and as they may be applied either in the sharp or flat key or series, * we have properly speaking, twenty-four keys. But as this number would greatly add to the difficulty of the musical art, and is by no means of real use, we seldom, and especially in psalmody, go beyond seven keys in the sharp series and the same number in the flat series. See the table on the opposite page.

In

* The learned should be particularly cautioned with respect to the ambiguous use of the word key. We often understand by it the relation, which the intervals contained in the octave bear to the key-note, and on which depends the characteristic air of any tune. In this sense we have only two keys the sharp and the flat, which I have here called the sharp or the flat series. At other times we mean by the key merely the letter or the name of the key note. And in this latter sense we reckon twelve keys in the sharp, and twelve in the flat series.

B	B	*CD	E	*FG	A	B	—	F and C sharp.*

Of the SINGING SYLLABLES.

IN practising musical lessons, it hath been recommended to appropriate peculiar syllables to the seven intervals contained in the octave. The end proposed is that the same name invariably applied to the same interval may naturally suggest its true relation and proper sound. The Italians and French make use of seven syllables for this purpose in the following manner: in the sharp series,

* From this specimen it will be seen that the key or series is not reckoned sharp or flat, with reference to the sharps or flats placed at the beginning of tunes; sharps may be prefixed to a tune in the flat key, or series, and vice versa, flats may be set before a tune in the sharp key.

§ For ut, is commonly substituted the syllable do, as more easy to be pronounced.

Ut § re mi fa sol la si ut.
1 2 3 4 5 6 7 8

In the flat series,

La si ut re mi fa sol la.
1 2 3 4 5 6 7 8.

These syllables are in effect only technical terms, which answer to the key-note the second, the third, and the several degrees of the octave. *Ut* and *la* are respectively the key-notes of the sharp and flat series; *ut re* denotes a tone, *mi fa* a semitone, *ut mi* a major third, *re fa* a minor third, *ut sol* a fifth, &c. &c.

Instead of the seven syllables, as above, the British musicians confine themselves to four, three of which are repeated, in order to complete the octave.—

In the sharp series,

Fa sol la fa sol la mi fa.
1 2 3 4 5 6 7 8.

In the flat series,

La mi fa sol la fa sol la.
1 2 3 4 5 6 7 8.

Fa answers to the key-note of the sharp series, and *la* to the key-note of the flat series; and the places of the semitones are represented by *la fa* and *mi fa*.

Mi which occurs only once in the octave, is called the *master-note*, because it determines the situation of the rest in the following order;

Above your *mi*, twice *fa, sol, la*;

Below your *mi*, twice *la, sol, fa*.

To find *mi*, observe whether the tune be in the sharp or the flat series. In the sharp series, *mi* is a semitone below the key-note; in the flat series it is a tone above the key-note. Or the following direction may suffice:

If neither flat nor sharp be placed at the beginning of a tune, *mi* is in B.

If B be flat, *mi* is in E.

If B and E be flat, *mi* is in A.

If B, E, and A be flat, *mi* is in D.

If F be sharp, *mi* is in F.

If F and C be sharp, *mi* is in C.

If F, C, and G be sharp, *mi* is in G.

Hence it appears, that there are no less than seven different ways of applying these syllables to the lines and spaces contained in the gamut, and consequently that Solmization is an exercise of considerable difficulty. And it hath been much queried, whether the utility of this practice corresponds with the labour required. For after we have attained to the ready use of the names in different

keys, we may fail of giving them the right sound. Some of the British syllables in particular are ambiguously applied. Thus, *fa sol* is at one time a second, at another a fourth; *fa la* a third, and also a sixth. And when accidental sharps or flats take place, or the music changes from one key to another, the whole principle is deranged, and the syllables must be accommodated to the new key that is introduced. Upon these accounts it hath been thought advisable not to lay much stress upon the singing syllables, but rather to direct our attention to the intervals themselves, and to regard only their places and proper sounds. If this latter method be adopted, the learner will find it of advantage before he practise any tune, to ascertain whether it be in the sharp or flat series, and to run through the notes successively from the key to the octave. And especially should be cautious to give a true sound to the third from the key-note, which in the sharp series is a *major* third, in the flat series a *minor* third, for this will naturally suggest the air of the tune, and lead to a right idea of all the other notes.

C H A P. IV.

Of various MUSICAL CHARACTERS and GRACES, with an Explanation of some ITALIAN WORDS.

REPEAT.] **D**OTS before a double bar require a repetition of the preceding strain. Dots after a double bar shew that the following strain is to be repeated. If some of the concluding bars have the figures 1, 2, with arches over them, it denotes, that when the strain is sung the first time over we are to omit the part inclosed by the arch 2, and when the strain is repeated we are to omit the part inclosed by the arch 1, and to conclude with the arch 2. See Plate I. Ex. 2. And S with dots before and after it, denotes that from the

place where it stands to the end of the strain or tune must be repeated. Ex. 9. Two oblique strokes with dots are often used for the same purpose, but placed between the staves they more frequently signify a repetition of the preceding words, as in Plate I. Ex. 9.

A DIRECT.] A DIRECT is a mark placed at the end of a stave, to apprise us where the first note of the following stave begins. Ex. 10.

A SLUR.] A SLUR (Ex. 11.) shews how many notes are to be sung to one syllable.

syllable. It sometimes also requires a gliding easy movement, in opposition to the mark called

STACCATO] Which implies that the notes thus marked must be sung with peculiar emphasis and distinctness. Plate I. Ex. 12.

APPOGGIATURA.] Appoggiatura is a note of smaller size than usual added to the regular notes which complete the bar. It is to be touched upon; that we may pass more gracefully from the preceding to the following note. And whatever time is employed in singing the appoggiatura, must be taken from the principal note to which it is annexed. Ex. 13

C H A P V.

GENERAL DIRECTIONS in respect to SINGING.

I. **I**N the choice of Tunes, let a particular regard be paid to the subject of the psalm or hymn. Different airs in music are suited to different sentiments and passions. A good taste will indeed enable us to make a nicer discrimination than words can readily suggest. But the following general rule is of principal importance, That tunes in the Sharp Key or Series are naturally expressive of cheerfulness and joy, and should therefore be adapted to psalms of Praise and Thanksgiving; and that tunes in the Flat Key are naturally expressive of humility, sorrow, and the tender affections, and should be sung to psalms of Prayer and of Penitence, or to subjects Mournful and Pathetic. This rule is too commonly violated, and with the most unhappy effect: for hereby the sentiments and the tune, are at variance with each other, and aim at contrary passions.--- The consequence is, that either the music must be without impression, or oppose the end which it ought to subserve. Whereas, when the tune and the sentiments properly accord, they mutually assist, and animate each other; the music acquires superior energy and expression, and adds vigour and delight to the sacred exercises of devotion.

A TRILL.] A TRILL, generally marked by tr. over a note, is one of the most difficult as well as beautiful graces that occurs in singing. It is a quick and alternate repetition of the note thus marked, and the note next above it, so long as the time allows. Ex. 14.

TURNED SHAKE.] Sometimes the note below that marked tr. is inserted a little before the conclusion of the trill, which is then called a TURNED SHAKE. Ex. 15.

A BRACE.] A Brace serves to connect so many parts as are to be sung or performed at the same time. Ex. 16.

II. The principal direction that can be given to the singer is, that he attend both to just TUNE, and to exact TIME. This is a rule of greater extent and importance than may at first appear. Few there are, who suspect themselves to err in these essential points; and few there are, who do not offend in one or both of them. Defects that are attributed to other causes do very frequently proceed from the neglect of tune, or of time. And there is nothing which more distinguishes the proficient in music, or is the source of greater beauty, than accuracy in both these respects. Here then should the learner direct his first and principal attention.

III. Graceful Singing is best learned by imitation and the instructions of a master. But it may not be amiss to mention some of the most notorious instances in which it is violated. These are, a vulgar, inarticulate, and muttering pronunciation; a heavy, drawling, lifeless manner, or sudden bursts and explosions of sound. On the other hand, the tone should be clear, smooth, distinct and spirited. Some there are, with so little idea of propriety as to exert the full stretch of the voice in singing, with no other intermission than is necessary to sup-

ply them with breath. This is not only inconsistent with grace and beauty, but intolerably shocking and disgusting. A voice thus strained is necessarily harsh and disagreeable, becomes incapable of that varied expression, which is the true character of music, and may bawl or scream, but can hardly be said to sing.

In sounds of considerable length we should observe the direction which is sometimes marked by the Italian words *crescendo* and *diminuendo*, viz. begin with softness, and increase in strength till we come to the middle of the note, and then gradually diminish to the end.

With respect to the more difficult ornaments, as the *appoggiatura*, and the trill or shake, they had better be omitted than performed in an awkward & imperfect manner. The introduction of other graces than what occur in the music should not be totally discouraged, but it is attended with much hazard, and often counteracts the meaning of the author, In full harmony this liberty should never be allowed, for it cannot produce a good effect, and probably will have a bad one,

It is of importance to chuse that part in singing which best agrees with the tone and compass of the voice, and to consider the particular expression which it requires. To the Bass belongs a bold and majestic accent, to the Tenor a firm and manly stile; the Counter should be soft and insinuating, and the TREBLE peculiarly sweet and delicate. The higher notes of the bass, and indeed of all the other parts, are to be sung softer than the lower ones.

The FORTE and PIANO, or the alternately singing loud and soft, when judiciously applied; has a pleasing and wonderful effect. How far it may be practicable in congregations to observe this distinction, particular circumstances must determine. It has been sometimes recommended, that the treble voices (with a bass accompaniment) take the principal air when the music is marked piano

and that the rest of the congregation be silent. It would perhaps be still better in a choir of singers, that all the parts be sung, but with sufficient softness to mark the contrast strongly with the forte. N. B. In the following collection of tunes we have seldom made use of the words forte and piano, because they may be variously applied. But in general the single tunes call for the piano on the third line, and the DOUBLE TUNES on the two lines which precede the two last.

IV. In a regular body of singers, care should be taken properly to adjust the strength of the different parts, and especially that the treble and the contra do not overpower the tenor and the bass. And when the parts are thus disposed, every one should keep true to his station. Order is necessary in musical as well as other societies. Nor can any thing be more injudicious or disrespectful than for a singer, who might render himself useful, sometimes to be quite silent, or to be continually rambling from part to part. This ill-timed levity must greatly injure the effect of the harmony, and by overpowering one of the parts, will frequently render the rest unmeaning or discordant.

V. To prevent the confusion and mistake which often arise from hurry and precipitation in the beginning of a tune, let the leader alone take the pitch, & leisurely proceed a few notes before he be joined by the other singers. And let him particularly observe whether the tune be of the sharp or flat series, and require the major or the minor third from the key note. Want of attention to this frequently misleads the band, and occasions a total stop. It would be of advantage also previously to fix upon the tunes which are intended for public worship. Such preparation would give readiness and confidence to the singers, and might prevent that conversation and bustle which are not only contrary to decorum, but the violation of an important duty.

Winchester. L. M.

My God accept my early vows like morning incense in thy house let my nightly worship rise Sweet as the Evening sacrifice

Suffield

Pf. 39

10

Musical score for 'Suffield'. It consists of four staves. The first two staves are for the piano accompaniment, and the last two are for the vocal line. The key signature is one sharp (F#) and the time signature is common time (C). The lyrics are: 'Teach me the measure of my days thou maker of my frame. I would survey life's narrow space. And learn how frail I am.' The score includes various musical notations such as notes, rests, and ornaments. There are 'S:' markings above the vocal line, and first and second endings are indicated at the end of the piece.

St. Anns

Musical score for 'St. Anns'. It consists of four staves. The first two staves are for the piano accompaniment, and the last two are for the vocal line. The key signature is one sharp (F#) and the time signature is common time (C). The lyrics are: 'My God my portion and my Love my ever last ing. all I've none but thee in Heav'n above no on this Earthly ball.' The score includes various musical notations such as notes, rests, and ornaments. There are 'S:' markings above the vocal line, and first and second endings are indicated at the end of the piece.

11 Funeral Thought

Handwritten musical score for 'Funeral Thought'. It consists of four staves. The first two staves are vocal lines in treble clef with a common time signature (C). The third staff is a lute or guitar accompaniment in treble clef with a common time signature (C). The fourth staff is a bass line in bass clef with a common time signature (C). The music is written in a style typical of 17th or 18th-century manuscript notation.

Hark from the Tombs a dolefull sound my ears attend the cry Ye living Men come view y ground where you must shortly lie.

Little Marlborough

Handwritten musical score for 'Little Marlborough'. It consists of four staves. The first staff is a treble clef with a 3/4 time signature and a key signature of one sharp (F#). The second staff is a bass clef with a 3/4 time signature and a key signature of one sharp (F#). The third and fourth staves are lute or guitar accompaniment in treble clef with a 3/4 time signature and a key signature of one sharp (F#). The music is written in a style typical of 17th or 18th-century manuscript notation.

Amherst P. M.

Musical score for 'Amherst P. M.' consisting of four staves. The first staff begins with a treble clef, a key signature of one sharp (F#), and a common time signature (C). The music is written in a single melodic line. The second and third staves appear to be accompaniment parts, with the third staff starting with a bass clef. The fourth staff continues the melodic line. There are several 'S:' markings throughout the score, likely indicating a section or a specific performance instruction.

Richmond Words by Rely

Musical score for 'Richmond' consisting of four staves. The first staff begins with a treble clef, a key signature of one sharp (F#), and a 6/4 time signature. The music is written in a single melodic line. The second and third staves appear to be accompaniment parts, with the third staff starting with a bass clef. The fourth staff continues the melodic line. There are several 'S:' markings throughout the score. Below the second staff, the lyrics are written: "My beloved haste away sick of love for thee I languish Fails my soul at thy delay Feels a dying lover's anguish".

My beloved haste away sick of love for thee I languish Fails my soul at thy delay Feels a dying lover's anguish

This spacious Earth is all the Lords and men & Worms & Beasts & Birds Herein d the Building on the Seas & gave it for their Dwelling place

But there's a brighter World on high thy Palace Lord above the sky Who shall ascend that blest abode and dwell so near his Maker God

S^t Hellens Pf. 146th D.W

40

Ill praise my Maker with my breath and when my Voice is lost in Death praise shall employ my Nobler

Powrs my Days of praise shall never be past while Life & Thought & being last Or Immor - ta - li - ty endures

Musical score for the first system of the hymn "Springfield". It consists of four staves. The top staff is the vocal line in G major, 4/4 time, with a treble clef and a key signature of one sharp (F#). The lyrics are: "Jesus drinks the bitter cup the Wine press treads alone Tears the graves and mountains up By his ex-pi-ri-ning groans". The second and fourth staves are accompaniment staves, likely for the right and left hands of a piano, in the same key and time signature. The third staff is a bass line, possibly for a cello or double bass, in the same key and time signature.

Jesus drinks the bitter cup the Wine press treads alone Tears the graves and mountains up By his ex-pi-ri-ning groans

Musical score for the second system of the hymn "Springfield". It consists of four staves. The top staff is the vocal line in G major, 4/4 time, with a treble clef and a key signature of one sharp (F#). The lyrics are: "Lo, the pow'rs of heav'n shake Nature in convulsion lies The earth's profoundest center quakes the great Jehovah dies". The second and fourth staves are accompaniment staves, likely for the right and left hands of a piano, in the same key and time signature. The third staff is a bass line, possibly for a cello or double bass, in the same key and time signature.

Lo, the pow'rs of heav'n shake Nature in convulsion lies The earth's profoundest center quakes the great Jehovah dies

The first system of musical notation consists of four staves. The top staff is a treble clef with a 3/2 time signature and a key signature of one flat. The second staff is an alto clef with a 3/2 time signature and a key signature of one flat. The third staff is a bass clef with a 3/2 time signature and a key signature of one flat. The fourth staff is a bass clef with a 3/2 time signature and a key signature of one flat. The music is written in a style typical of 18th-century church music, featuring a mix of quarter, eighth, and sixteenth notes, along with rests and bar lines.

The second system of musical notation consists of four staves, continuing the piece from the first system. The notation is consistent with the first system, featuring a treble clef, an alto clef, and two bass clefs, all in 3/2 time and one flat key signature. The music continues with various rhythmic patterns and rests.

Let differing nations join to celebrate thy fame & all the world O Lord combine to praise thy Glorou name

and all the world O Lord combine & all the world O Lord combine &c

And all the world O Lord O Lord combine

& all the world O Lord combine to Praise to Praise to Praise thy glorious name

& all the world O Lord O Lord &c

Windsor Pf. 39.

44

Musical score for Windsor Pf. 39, measures 1-16. The score is written on four staves. The first staff is the treble clef, the second is the alto clef, the third is the tenor clef, and the fourth is the bass clef. The music consists of quarter and eighth notes, with some rests and accidentals.

Trinity. Pf. 145

Musical score for Trinity. Pf. 145, measures 1-16. The score is written on four staves. The first staff is the treble clef, the second is the alto clef, the third is the tenor clef, and the fourth is the bass clef. The music consists of quarter and eighth notes, with some rests and accidentals.

45 South Ockendon Pf. 47.

Our God ascended up on high with joy and pleasant Noise The Lord goes up a bove the sky with Trumpets royal Voice

Our God ascended up on high with joy and pleasant Noise the Lord goes up a bove the sky with Trumpets royal Voice

This musical score consists of three staves. The top staff is a vocal line in treble clef with a 3/2 time signature. The middle and bottom staves are instrumental accompaniment lines, with the middle staff in treble clef and the bottom staff in bass clef. Both accompaniment staves share the 3/2 time signature. The lyrics are written below the vocal line and are repeated on the second staff.

Buriall Pf. 116.

What shall I render to my God for all his kindness shewn my feet shall visit thine Abode My songs address thy throne

This musical score consists of three staves. The top staff is a vocal line in treble clef with a 3/4 time signature. The middle and bottom staves are instrumental accompaniment lines, with the middle staff in treble clef and the bottom staff in bass clef. Both accompaniment staves share the 3/4 time signature. The lyrics are written below the vocal line.

49 The 15th Pf. Tune

This image shows a handwritten musical score for a piece titled "The 15th Pf. Tune". The score is written on aged, yellowed paper and consists of four systems of music, each with two staves. The first two systems are for the treble and bass clefs, while the last two systems are for the right and left hands of a lute or guitar, indicated by the presence of fret lines. The notation includes various note values, rests, and articulation marks. The first system has a treble clef and a key signature of one sharp (F#). The second system has a bass clef and a key signature of one sharp. The third system has a treble clef and a key signature of one sharp. The fourth system has a bass clef and a key signature of one sharp. The piece concludes with a double bar line and a repeat sign. There are several "S:" markings above the staves, likely indicating sections or ornaments. The handwriting is in a historical style, and the paper shows signs of age and wear.

S^t Martins

Musical score for "St. Martins" (measures 1-12). The score is written on four staves. The top staff is in treble clef with a key signature of one sharp (F#) and a 3/2 time signature. The second staff is in alto clef with a key signature of one sharp (F#) and a 3/2 time signature. The third staff is in treble clef with a key signature of one sharp (F#) and a 3/2 time signature. The bottom staff is in bass clef with a key signature of one sharp (F#) and a 3/2 time signature. The music consists of a series of notes, many with slurs and ties, indicating a melodic line. There are repeat signs (double bar lines with dots) at measures 4, 8, and 12.

Sutton

Musical score for "Sutton" (measures 1-12). The score is written on four staves. The top staff is in treble clef with a key signature of one sharp (F#) and a 3/2 time signature. The second staff is in alto clef with a key signature of one sharp (F#) and a 3/2 time signature. The third staff is in treble clef with a key signature of one sharp (F#) and a 3/2 time signature. The bottom staff is in bass clef with a key signature of one sharp (F#) and a 3/2 time signature. The music consists of a series of notes, many with slurs and ties, indicating a melodic line. There are repeat signs (double bar lines with dots) at measures 4, 8, and 12.

51 Dalton Pf. 122 D.W

How pleas'd & blest was I To hear the people cry Come let us seek our God to day

The first system of the musical score consists of four staves. The top staff is a vocal line in G major, 3/4 time, with lyrics: "How pleas'd & blest was I To hear the people cry Come let us seek our God to day". The second staff is a piano accompaniment in G major, 3/4 time. The third and fourth staves are also piano accompaniment parts, likely for the right and left hands of a keyboard instrument, in G major, 3/4 time.

Yes with a cheerfull Zeal we haste to Zions Hill and there our vows and Honours pay

The second system of the musical score consists of four staves. The top staff is a vocal line in G major, 3/4 time, with lyrics: "Yes with a cheerfull Zeal we haste to Zions Hill and there our vows and Honours pay". The second staff is a piano accompaniment in G major, 3/4 time. The third and fourth staves are also piano accompaniment parts, likely for the right and left hands of a keyboard instrument, in G major, 3/4 time.

Lisbon. S. M.

In palaces of joy In &c.

Augment our swells our tones re fine Performance ours the glo ry glo ry thine &c.

The image shows a page of handwritten musical notation on aged paper. At the top left, the number '65' and the title 'Lancaster. L. M.' are written. The music is arranged in several systems, each containing two staves. The top staff of each system is in treble clef, and the bottom staff is in bass clef. The lyrics are written below the staves, often with the word 'Augment' written above certain notes. The lyrics include: 'Majestic God our music in Spiro And fill us with seraphic fire Augment our swells our tones re fine Performance ours y glory thine. Augment our swells our tones', 'Augment our swells our tones re fine Performance ours the glo ry glo ry glo ry thine &c.', 'Augment our swells our tones re fine Augment our swells our tones re fine Performance ours the glo ry glo ry thine &c.', and 'Augment our swells our tones re fine Performance ours the glo ry glo ry thine Performance ours the glo ry glo ry thine &c.'. There are several instances of the instruction ':S:' written above the notes, likely indicating a swell or a specific performance technique. The paper shows signs of age, including some staining and wear at the edges.

Virginia C.M. :S:

Thy Words the raging wind controul And rule the boist'rous deep Thy makst the sleeping billows roll the rolling billows sleep the rolling billows sleep

Come let us sing unto the Lord & praise his name with one accord in this design one chorus raise

The first system of the musical score consists of three staves. The top staff is in treble clef, the middle in alto clef, and the bottom in bass clef. The music is in 3/2 time and features various note values including minims, crotchets, and quavers, with some notes beamed together. There are several slurs and phrasing marks throughout the system.

From east to west his praise proclaim; From pole to pole extol his fame, the skies shall echo back his praise

The second system of the musical score also consists of three staves in the same clefs and time signature as the first system. It continues the melody and accompaniment, ending with double bar lines. The lyrics are printed below the middle staff.

Fame. P. M.

To him that chose us first before the world began. To him y bore the curde to save rebellious man, To him that form'd our hear's anew is endless praise & glory due

S^t Thomas's. S. M.

Let ev'ry creature join To praise th'e.ternal God; Ye - heavenly hosts the song begin And sound his name a broad

Ye tribes of A-dam join with heavn & earth and seas and offer notes di-vine to your Creators, praise

Ye holy throng of angels bright in worlds of light &

Ye holy throng of angels bright in worlds of light begin the song

Ye holy throng of Angels bright Ye &c.

holy throng of angels bright ye holy . throng of angels bright in worlds of light &c.

St Vincent's.

In vain we Lavish out our Lives... to gather empty wind the Choicest Blessings. Earth can yeild will Starve a hungry mind

Bedford.

Behold what wondrous grace the Father has be-stowd on Sinners of a mortal Race To call them Sons of God

Great spirit understanding's King Reason & truth must join to bring Worship which may presume to meet Acceptance at thy holy seat

The bled hand the bended knee, Is but vain homage Lord to thee; In vain our lips the hymn prolong The heart a stranger to the Song
